Type	Name
Operations Manual	Croco 102/202, 107/207

The plans are subject to change. Only use the latest version.

1.1 Intended use

The Croco 102/202, 107/207 rack-and-pinion drive is designed for the automatic opening and closing of sliding doors. The door operator is only suitable for use in panel vans. This door operator fulfils the requirements of UN/ECE R107, 7.6.5.

Any use other than the intended use, e.g. permanent manual operation, and all modifications to the product are not permitted. Observe the 'ADOR product information for drives'.

1.2 Safety instructions

- > Prescribed installation and maintenance work must be carried out by qualified personnel.
- > Assembly requires holes to be drilled in the body parts. The exact position of these drill holes is required in order to maintain the positional accuracy of the assembled components.
- > The country-specific laws and regulations must be observed for safety inspections must be observed.
- > Unauthorised modifications to the drive exclude any liability on the part of ADOR for resulting damage.
- > ADOR accepts no warranty for combinations with third-party products.
- > Only original ADOR parts may be used for repair and maintenance work.
- > In accordance with the Machinery Directive 2006/42/EC, a hazard analysis must be carried out before the door system is a risk analysis must be carried out and the door system labelled in accordance with the CE marking directive 93/68/EEC.
- > Observe the latest directives, standards and country-specific regulations, in particular:
 - > DIN VDE 0100-600: 'Installation of low-voltage systems; Part 6: Tests'
 - > DIN EN 60335-2-103, DIN 18263-4
 - > Accident prevention regulations, in particular BGV A1 'Principles and prevention' and BGV A3 DA 'Implementation instructions for the accident prevention regulation 'Electrical Installations and Equipment'

The product should be installed in such a way that easy access to the product for repairs possible repairs and/or maintenance with relatively little effort and that any and any removal costs are not disproportionate to the economic value of the product. disproportionate to the value of the product.

Congratulations on your purchase of this sliding door driveCROCO and hope that you are satisfied with its functions.

If you have any questions regarding maintenance or repair, please contact ADOR.

You are welcome to send us questions or suggestions by e-mail to info@ador-eu.de.

Careless use of this drive can be dangerous.

People, especially children, can be injured by the moving sliding door.

The responsibility for the safe operation of this automated sliding door lies with the driver of the vehicle.

The enclosed sticker must be affixed to the outside of the vehicle so that it is clearly legible, see page 4.

These operating instructions provide you with information on maintenance and problems such as malfunctions and breakdowns.

The sliding door may only be operated when the vehicle is stationary. when the vehicle is stationary.

Failure to do so is negligent and may result in personal injury. personal injury. Damage to the drive is possible.

This door operator fulfils the requirements of UN/ECE R107, 7.6.5.

CROCO drive is designed for opening and closing doors in minibuses working as taxi buses or camper vans. You will find a list of models on the cover page.
If your model is not listed, please ask us.

Technical data	
Power consumption (rating)	70 W
Power consumption (max)	250 W
Door-opening time, (it depends upon the opening width adjustment)	2 - 3 Sek.
Door-closing time, (it depends upon the opening width adjustment)	2 - 3 Sek.
Category temperature range	-40°C bis +55°C
Maximum slop for the door to be closed	10%
Resources	Not less then 800.000 cycles

The reliability and durability of this drive depends largely on the installation work

OPENING / CLOSING THE SLIDING DOOR

Press the control button briefly, ~ 0.5 sec. The sliding door starts moving immediately after the control button is released.

STOPPING THE OPENING MOVEMENT

To stop the sliding door during the opening movement, briefly press the control button. Pressing the control button again closes the sliding door.

STOPPING THE CLOSING MOVEMENT

To stop the sliding door during the closing movement, press the control button once briefly. The sliding door immediately moves immediately to the open position.

AUTOMATIC RETURN DURING THE CLOSING MOVEMENT

If there is a risk of collision with or entrapment of persons or objects, the the sliding door stops and returns to the open position.

SETTING THE DOOR OPENING WIDTH

Open the sliding door manually and move it to the desired open position. Now press and hold the control button until the acoustic signal sounds twice, ~ 10 sec, then release the control button. The new open position is saved.

SETTING THE DRIVE MODE

Press and hold the control button until the acoustic signal sounds three times, ~ 15 sec, then release the control button. The operator is in CROCO 107-207 mode.

RESTORING THE FACTORY SETTING

Press and hold the control button until the acoustic signal sounds four times, ~ 20 sec, then release the control button. The drive is in CROCO 102-202 mode.

Additional feature Croco 107-207

The movements to the open and closed positions are approached gently, i.e. the speed is slowly reduced before these.

The drive settings are reset to the factory settings in the event of a power failure.

Emergency door opening from the outside

1. Pull and hold the door handle (Fig. 1)
2. Pull the left-hand part of the door towards you (Fig. 1)
3. Open the door with the door handle to the left, (Fig. 1)

Emergency door opening from the inside

1. Turn and hold the door handle (Fig. 2)
2. Push the drive diagonally outwards to the left (Fig. 2)
3. Open the door with the door handle to the right, (Fig. 2)

Manual mode reset

1. Remove the stop angle (Fig. 3).
2. Remove the drive cover (Fig. 3).
3. Pull off the drive plug (Fig. 3).
4. Unscrew the balljoint (Fig. 4).
5. Remove the drive off the rack (Fig. 4).

The sliding door now operates manually.

In order to enjoy this drive for a long time, regular maintenance is required.

This depends largely on the frequency of use.

These tasks are listed in the following table.

If you are unable to carry out this work, please contact a vehicle service company for advice.

MAINTENANCE

No.	Operation	monthly	1/4 y.	1/2 y.	yearly
1	Visual inspection of drive and sliding door assemblies and parts	-	-	+	-
2	Wear inspection of sliding door contacts	-	-	+	-
3	Check the fastenings of the rack and retighten if necessary	-	-	-	+
4	Visual inspection of door gap	-	-	-	+
5	Checking the plug/socket connections of the main wiring harness	-	-	-	+
6	Adjust the ball joint if necessary	-	-	-	-
7	Check the fastenings of the cradle	-	-	-	+
8	Check condition of the belt, adjust the tension or replace if necessary	-	+	-	-

Care instructions

No.	Type of work	Frequency
1	Clean and lubricate the rack (e.g. with WD 40)	weekly/ 1/4 yearly
2	Clean and grease door guides and carrige rollers	weekly/ 1/4 yearly
3	Clean and lubricate contacts groups	weekly/ 1/4 yearly
4	Check balljoint for wear and replace if nec.	1/2 yearly/ every 2 years

Battery replacement (optional)

Remove the bottom cover in the remote control.
Battery type: CR2016, 2 pieces

Please document or have documented any maintenance work carried out in the service certificate

Carry out the first maintenance one month after initial installation

If the drive knocks, cracks, creaks or the sliding door shakes shake, contact your vehicle service center or us immediately. service or to us

Arrangement of the sliding door contacts groups

The Ador warranty for this drive is 12 months or 150,000 opening/closing cycles in the vehicle, e.g. minibus.

There are no warranty claims for the following components:

- Sliding door contacts
- Control button

Exclusion from the warranty:

- No professional installation of the drive
- Missing or incorrectly completed warranty certificate
- Damaged component labeling
- Maintenance certificates not available or deadline not met
- Damage caused by improper operation or maintenance
- Unauthorized connection of additional components that affect the drive functionality and any other electrical modification
- No professional repair or accidental damage
